Projects:

Name: Chemistry Corner   Live Site | Github Client | Github Server
Description: This website is based on an online dating platform designed to reorganize the way people connect and find meaningful relationships. With a range of features, it's poised to redefine the online dating experience.

Key features:
- An User can Create an account. The process of registration and login authentication and authorization is user friendly. Users have the freedom to create and manage detailed profiles that include personal information, photos, and interests. It has easy editing and updating options.
- It provides users with powerful search options. You can filter potential matches based on specific criteria such as gender, age, location and more, ensuring you find the right match tailored to your preferences.
- You can enjoy seamless communication with your matches through real-time chat functionality.
- Stay updated with notifications for new messages, and other relevant updates, ensuring you never miss out on potential connections.

Technology used: Tailwind css, React - Vite, Node.js(Express), Mongodb, Firebase Auth, redux, Tanstack Query, Socket.io

Name: Travlerz   Live Site | Github Client | Github Server
Description: This website is mainly made for a travel and tourism agency. Here you can find various new tour packages and destinations.

Key features:
- You can Create your account and book a tour for your destination. For Login and Registration auth it has firebase auth.
- After creating an account you can see all tour packages and destinations. Full website is made with the help of React.js (Vite)
- In the destination and package page you can see various new packages and destination information posted. You can view destinations and package information and book tour packages. For the database it uses mongodb atlas.

Technology used: Tailwind css, React - Vite, Node.js(Express), Mongodb, Firebase Auth.

Name: Summer-symphony   [Live Site](#) | [Github Client](#) | [Github Server](#)
Description: This website is for summer camp learning school. Here a user can find an online class. He/she can buy a class by payment. Admin can make any user instructor. An instructor can create and manage a class. Admin can manage classes and users.

Key features:
- A user can Create an account and buy classes by online payment. I use stripe js for that.
- An admin can make any user admin or Instructor. I use axios and jwt for managing admin, user and instructor roles.
- In the backend server I use node.js, Express.js. For API CRUD I use MongoDB

Technology used: Tailwind css, React - Vite, Node.js(Express), Mongodb, Firebase Auth, axios, tanstack query, jwt.
